

AUREALIS

While searching for the mythical Eldorado deep within the Amazon rainforest, a group of adventurers discovered an even more extraordinary land, the cradle of a brilliant civilization that has since vanished. This pacifist society seemed to place great importance on the benefits of solar energy, which they called Aurea.

In an alternate 19th century, take on the role of a team of explorers, archeologists, and naturalists traveling, card after card, through this marvelous region known as Aurealis. Complex relics, mysterious temples, fascinating vegetation, and fantastical animals will soon hold no secrets for you!

COMPONENTS

9 Relic tiles

9 Legendary animal tiles

6 Gold coin tokens (x3)

20 Jungle cards

52 Adventurer cards

4 Renown tiles

6 Temple tiles

6 Excavation site pawns

14 Archeologist pawns

4 Base camp cards

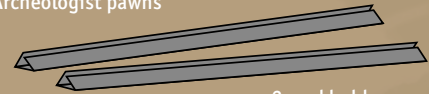

1 Instant victory tile

18 Gold coin tokens (x1)

16 Animal pawns

2 card holders

GAME SETUP

Shuffle the deck of Adventurer cards, as well as the deck of Jungle cards.

PLAYER AREA

1 Each player takes a card holder and draws 5 Adventurer cards, which they place on their holder (the backs of the cards must be visible to your opponent). This forms your hand.

2 Take a random Base camp starting card , place it (A-side) in front of your card holder so that it is visible to your opponent, then place your 7 Archeologist pawns  onto it.

3 Finally, draw a Jungle card  and place it on the right-hand side of your Base camp .

COMMON AREA

4 Take the Adventurer card deck, form a draw pile, and place it face down between the two players. Then, take the top 4 cards from the draw pile and place them next to it, still face down. These 5 card backs form the Adventurer card pool.

5 Leave an empty space next to the draw pile for the discard pile. The discarded cards are placed face up, so that the draw and discard piles can be clearly distinguished.

6 Take the Jungle card deck , form a face-up draw pile. Then, take the top 2 cards and place them beside it, face up. These 3 cards form the Jungle card market.

7 Randomly select 4 Temple tiles from the 6 available. Place them under the Jungle card market and return the remaining 2 to the box (they will not be used in this game).

8 Place the 4 Renown tiles beneath the Temple tiles and arrange the other tiles (Relic, Legendary animal, and Instant victory) nearby so that they are easily accessible to all players.

9 Place the Gold coin tokens , as well as the Excavation site  and Animal pawns , on the table within reach of all players. This forms the general supply.

RANDOMLY SELECT THE FIRST PLAYER

- The first player receives 3 Gold coins .
- The second player receives 4 Gold coins  and gains the following two effects:
 - 10** They move an Archeologist pawn  onto the first Jungle card in their play area.
 - 11** They receive an Animal pawn , which they place on the first Animal slot on their Jungle card.

The game can start!

GOAL OF THE GAME

Leading a team of intrepid adventurers, embark on a frantic race across the land of Aurealis. Set out to discover legendary animals, magical relics, and forgotten temples. Each discovery will bring you closer to victory and increase your renown...

But be careful, you're not alone! A rival team is pursuing the same goal. Outwit them and make your team the best by being the first to collect 7 tiles!

CARD TYPES AND HOW THEY WORK

There are two types of cards in the game: **Adventurer** cards and **Jungle** cards.

ADVENTURER CARDS

These cards make up your hand, you will always have 5 of them on your card holder. On your turn, you may choose to play one of your cards to activate its effect, but only if you meet at least one of its conditions.

There are 4 types of Adventurer cards:

Expedition leaders allow you to obtain Gold coins (👛) to finance the expedition.

Naturalists observe animals and allow you to place Animal pawns (🐾) on your Jungle cards.

Explorers allow you to buy and add Jungle cards (🌴) to your play area.

Archeologists allow you to move your Archeologist pawns (🧑‍🔍) from one Jungle card to another.

Adventurer cards always allow you to perform the action granted by their primary type (an Archeologist card (🧑‍🔍) will always allow you to move your Archeologist pawns (🧑‍🔍), but these cards often have a secondary type that differs from the primary one (as shown below).

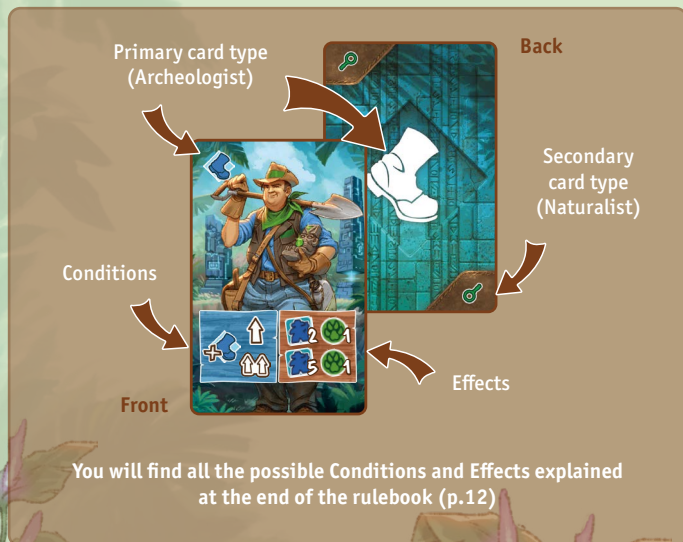

Archeologist card with an Expedition leader secondary type.

Its effects are both Archeologist and Expedition leader.

The secondary type **does not count when checking if the conditions are met or not** (see Conditions, p. 6). The card above is solely of the Archeologist type (🧑‍🔍). However, the card's effect is indeed of both types: it allows you to both move your Archeologist pawns (🧑‍🔍) and earn Gold coins (👛) (a specific effect of the Expedition leader (👛)). This information can therefore influence your choice of cards when you replenish your hand at the end of your turn.

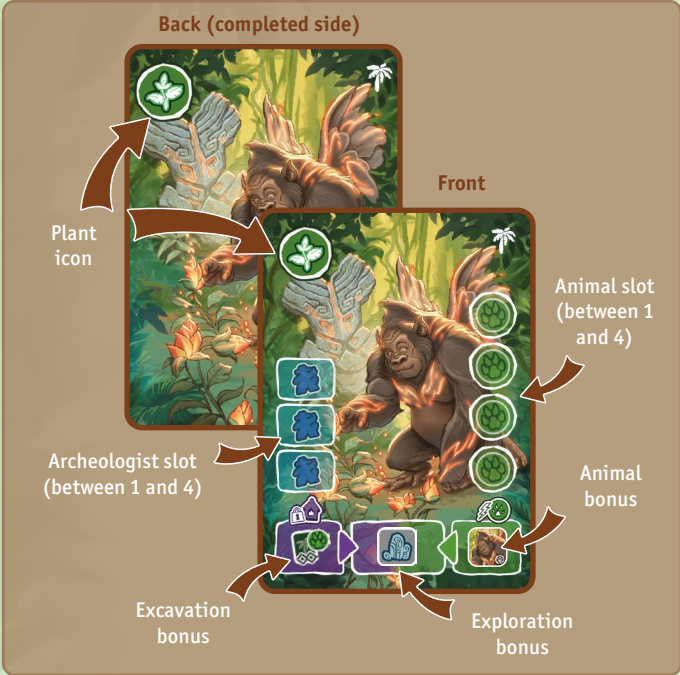

Note: If the primary type and the secondary type are the same, the effect will be of a single type but will be more powerful.

JUNGLE CARDS

Jungle cards  represent new locations that you will explore. When you draw a new Jungle card, place it to the right of your most recent card, in your play area. Then, try to gain the card's bonuses by fulfilling its various requirements.

Jungle card bonuses come in various types but mostly allow you to obtain tiles that will help you progress toward victory.

HOW DO YOU EARN BONUSES?

Excavation bonus

This bonus is **locked** . To get it, build an Excavation site (see Build an Excavation site, p. 7) on the Jungle card. Then, place the Excavation site pawn on the Excavation bonus space.

Animal bonus

You must place as many Animal pawns as there are Animal slots on the card. Once done, **immediately** claim the bonus , slide one of the Animal pawns onto the Animal bonus space, and return all the others to the supply.

Exploration bonus

Once the Excavation and Animal bonuses have been claimed (Excavation and Animal bonus spaces are occupied by a pawn), **immediately** claim the Exploration bonus. Then remove the pawns and flip the card to its completed side (back). Finally, return any additional Archeologist pawns, previously placed on the card, onto it.

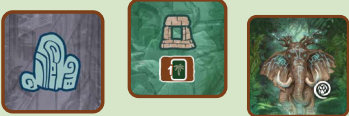

***Note:** The various bonuses can be claimed during the same turn or on different turns. You may fulfill the requirements in any order you choose.*

***Note:** A bonus space may be empty (meaning that it contains no reward). However, to obtain the Exploration bonus, you must have completed the Excavation and Animal bonuses on the card, even if they are empty.*

TILES

There are two types of tiles in the game:

- **Discovery tiles:** these are elements you will discover on your Jungle cards (Relic, Temple, Legendary animal). Once acquired, they remain in your play area until the end of the game.

- **Renown tiles:** these tiles may move from one player to the other depending on the elements in play (see Check Renown, p. 10).

HOW TO PLAY

Take turns playing one after the other, starting with the first player, until one of you wins the game by having **7 or more tiles in front of them at the START of their turn.**

A turn consists of 4 steps:

- I. Check for game end**
- II. Perform an action**
- III. Check Renown**
- IV. Complete your hand of cards**

I. CHECK FOR GAME END

If, at the start of your turn, you have 7 or more tiles (all types combined: Discovery and Renown) in your play area, the game ends immediately and you win (see End of the Game, p. 11).

II. PERFORM AN ACTION

You must perform 1 action from the following 3:

- 1. Play an Adventurer card**
- 2. Build an Excavation site**
- 3. Perform a Base camp action**

Note: If the selected action triggers other effects, apply them immediately.

1. PLAY AN ADVENTURER CARD

This is the most common action in the game.

Select a card, apply its effect (gain Gold coins 🏆, place Animal pawns 🐾, move your Archeologists 🧑🔍, discover new Jungles 🌴), then discard it.

You may only play a card **if you meet at least one of its conditions.** Otherwise, you cannot play it.

Note: The activation conditions for an Adventurer card always take into account **the main type of cards in play.** These conditions may concern cards in your hand, your opponent's hand, or the Adventurer cards pool (the 5 visible card backs at the center of the table, with the top of the draw pile being the 5th).

CONDITIONS

Adventurer cards may have one or more Condition-Effect lines:

1 condition

2 conditions

3 conditions

When there are multiple Condition-Effect lines for which you meet the conditions, apply only the most powerful effect.

Example:

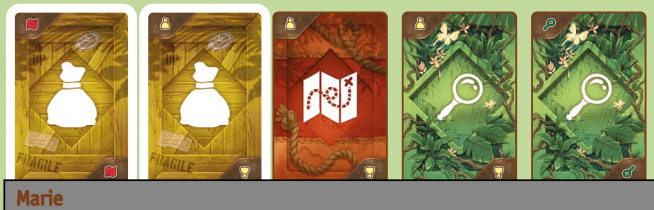

There are 5 Naturalist cards in play, so Arthur only applies the effect of the second row.

Note: A card always counts toward its own condition (see Example, p. 7). The condition is checked by considering your entire hand **BEFORE** discarding the played card.

Note: Find the description and details of all Conditions and Effects of Adventurer cards at the end of the rulebook (p. 12).

Example:

Adventurer pool

Arthur

On his turn, Arthur plays this card **1**. He has three Expedition leader cards (👤) in his hand, while his opponent has two of them, and there is also one in the Adventurer cards pool. He therefore meets the condition of the second row **2**, which requires having strictly more cards of the Expedition leader type (👤) than his opponent and the pool (👤). He consequently gains 6 Archeologist moves or Gold coins (to be split as he wishes) **3**.

He moves an Archeologist to his 2nd Jungle card, which costs him 2 movement **4**. Then, he moves another Archeologist to his 1st card, which costs him 1 movement **5**. He has therefore made 3 movement and takes 3 Gold coins from the supply.

2. BUILD AN EXCAVATION SITE

To perform the **Build an Excavation site** action, all Archeologist slots on a Jungle card must be occupied by an Archeologist pawn.

Note: Excavation sites are not automatically built. You must spend your **entire** turn to perform this action!

Note: You may build only one Excavation site per turn and only one Excavation site per card.

In this example, Arthur can build an Excavation site on his Jungle cards 1 and 3 since he has moved as many Archeologist pawns as necessary onto those cards.

If the conditions are met, take an Excavation site pawn (🏠) from the general supply and place it on the corresponding space **1**. Then, remove the Archeologist pawns from their slots **2** and return them to your Base camp (🏠). Any additional Archeologists on the card remain in place. Finally, apply any potential Excavation bonus (see Iconography, Jungle cards, p. 12).

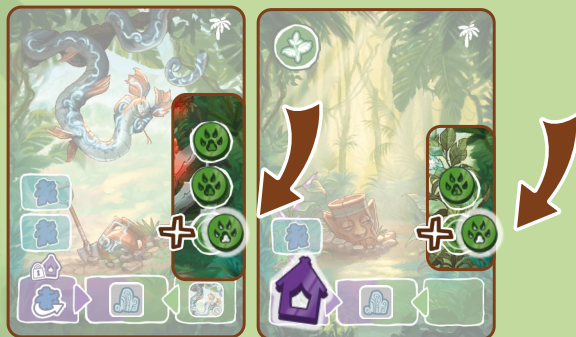

Example of chain reactions after building an Excavation site:

During his turn, Arthur decides to build an Excavation site on his Jungle card 2. He places an Excavation site pawn on the Excavation bonus space and returns the Archeologist pawn to his Base camp card. Finally, he applies the effects triggered by this action.

By building his Excavation site, he gains the Excavation bonus, which allows him to add an Animal pawn to each of his Jungle cards.

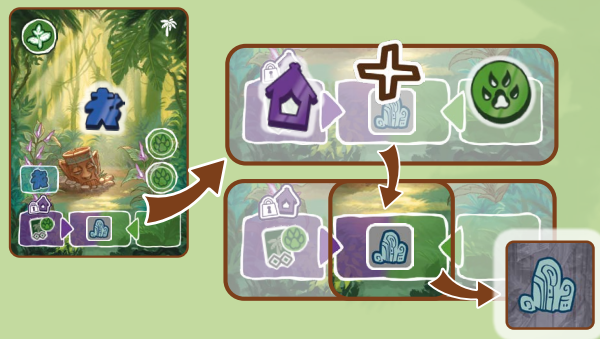

This action triggers two additional bonuses:

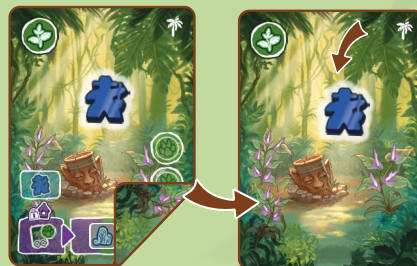

On his Jungle 1 card, having filled all the Animal slots, Arthur gains the Animal bonus and receives a Legendary animal tile from the general supply. He then removes all Animal pawns from this card, except for one, which he slides on the Animal bonus space to indicate that the bonus has been achieved.

On his Jungle 2 card, Arthur unlocks the Exploration bonus and receives a Relic tile since the Excavation and Animal bonuses have just been completed.

Finally, since all bonuses have been obtained on this card (Jungle 2), Arthur flips it over to its back (completed) side and places the additional Archeologist, who remained there, back on the card. Only the Plant icon remains visible on this side, as it counts toward the Plant Renown objective.

3. PERFORM A BASE CAMP ACTION

There are four special actions on your Base camp card . To perform one, discard 3 Adventurer cards from your hand and choose to activate one of the four abilities.

Note: Performing a Base camp action can be useful (even early in the game) if all the conditions on your cards are difficult or even impossible to meet, or if you want to renew your hand more quickly (see Complete your hand of cards, p. 11).

Note: These cards have two sides: an improved A-side, unique to each player, and an identical for everyone B-side. At the beginning of the game, place your card face up on A-side.

If you activate your enhanced ability (on a light background), flip your Base camp card  to its B-side; it will remain on this side until the end of the game. **Your enhanced ability can only be used once.**

Example:

On his turn, Arthur decides to perform one of his Base camp's actions. He discards 3 cards from his hand and activates the effect that allows him to buy a new Jungle card for 5 Gold coins .

He places his new Jungle card after the others and flips his Base camp card to its B-side since he has used his enhanced ability.

III. CHECK RENOWN

At the end of your turn, before drawing a card to complete your hand, check the Renown objectives and assign or reassign the tiles accordingly. Renown tiles have a threshold for claiming them. If one of the players reaches a threshold, they claim the corresponding tile. **But be careful: if your opponent matches or exceeds your Renown objective, they immediately claim the tile.** Keep a close eye on your opponent so they don't take all the Renown tiles!

***Note:** If, at the end of your turn, you have 7 or more tiles in front of you, that does not mean you have won the game. During their turn, your opponent can take Renown tiles placed in front of you if they match or exceed your Renown objectives.*

RENOWN TILES

The first player to obtain 2 Legendary animal tiles gets this tile.

The first player to obtain 2 Relic tiles gets this tile.

The first player to acquire 3 Jungle cards gets this tile.

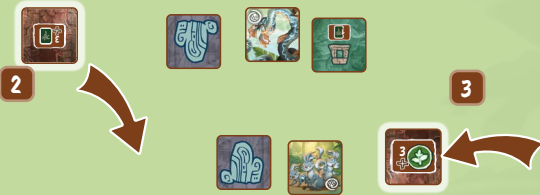

The first player to have 3 Plant symbols in their play area (cards and tiles) gets this tile.

Example:

Before completing his hand, Arthur checks the Renown.

During his turn, Arthur drew a new Jungle card **1**. By matching Marie's score, he takes the Jungle Renown tile **2** from her. He also takes the Plant Renown tile **3** from the general supply since he now has 3 Plant icons **4** in his play area.

Marie

Arthur

IV. COMPLETE YOUR HAND OF CARDS

At the end of your turn, complete your hand until you have 5 cards. Select them from the Adventurer cards pool.

When you must draw 3 Adventurer cards after performing a Base camp action, select your cards all at once, without replacing any of them or looking at their effects. You may draw from the deck multiple times.

Finally, replenish the Adventurer cards pool until there are 5 visible card backs. If the deck is empty, reshuffle the discard pile. Also replenish the Jungle card market as needed (3 Jungle cards available).

END OF THE GAME

There are two ways to win the game:

- If a player has 7 tiles (of any type: Discovery and Renown) in their play area at the **START of their turn**, they win the game.
- If, at any time, a player is about to obtain their third Temple tile (see Iconography, Jungle cards, p. 12), they instead receive the **Instant victory** tile and win the game immediately.

ACKNOWLEDGMENTS

Many thanks to the entire team at La Boîte de Jeu, and especially to Benoit and Violaine for their trust and creativity. Thanks also to Alexandre Bonvalot for his beautiful illustrations, which bring the game to life so well. Finally, thanks to my loyal team of testers: Yann, Jérôme, Simon, Marie, Pieter, Luc, Arthur, Charlot, and, of course, Achille and Aline, who accompany me on all my playful explorations.

Joachim

ICONOGRAPHY

ADVENTURER CARDS

The examples are explained with a specific type of cards, but variations exist for all four types ( /  /  / .

CONDITIONS

If you do not have any Archeologist card in your hand.

If you have all 4 types of cards in your hand.

For  Expedition leader cards in play ("?" representing the total number of cards in the 3 decks: yours, your opponent's, and the pool).

If at least one Naturalist card is present in your opponent's hand or in the pool 
OR in both areas .

If you have at least 2 Explorer cards in your hand.

If you have strictly more Archeologist cards than your opponent or than the pool 
OR than both 
Also exists with strictly fewer .

EFFECTS

Gain 3 Gold coins.

Gain 3 Archeologist movement (1 movement equals moving one Archeologist pawn to an adjacent card).

Gain 2 Animal pawns and place them anywhere on available Animal slots on your Jungle cards (if you have no more available slots, the pawns are lost).

Gain 5 Archeologist movement or Gold coins (distribute the 5 gains as you wish).

Pay 5 Gold coins to obtain a new Jungle card. Choose one Jungle card from the 3 available and add it to the end of your other Jungle cards (adjacent to the last one on the right-hand side).

JUNGLE CARDS

Gain 1 Relic tile.

Gain 1 Temple tile. Choose one and apply its bonus immediately (see below). If you cannot perform the effect shown on the tile, and there are no other Temple tiles available, forfeit the effect but keep the tile.

Gain 3 Gold coins.

Send 1 Archeologist pawn to any Jungle card from your Base camp or from another Jungle card.

Place 1 Animal pawn on each of your Jungle cards.

Gain the Legendary animal tile corresponding to your card.

TEMPLE TILES

Gain 9 Archeologist movement or Gold coins (distribute the 9 rewards as you wish).

Gain 4 Animal pawns and place them anywhere on available slots on your Jungle cards (if you have no more slots available, the pawns are lost).

Gain 6 Archeologist movement or Gold coins (distribute the 6 rewards as you wish) and 1 Plant icon counting toward the Plant Renown objective.

Buy 1 Jungle card for 1 Gold coin.

Take the 3 last cards from the Jungle deck and buy one for 3 Gold coins (return the other cards to the bottom of the deck).

Send any 4 Archeologist pawns to any Jungle card from your Base camp or from another Jungle card (distribute your Archeologists as you wish).
